

# **Presto** LIFTS **ECO**A

## Portable Dock Lifts

- Trans-A-Dock dock lifts deliver all of the benefits and advantages of a permanent dock lift without the need for pit mounting.
- They have 3,000, 4,000 and 5,000 pound capacities. Ideal for use in leased buildings, or places where permanent installation is not possible or practical.
- The lifts can transfer loads at grade level, or to fixed-height docks or a truck bed up to 5 feet high.
- Platforms measure 72 by 72 or 72 by 96 inches and are made of safety tread steel plate. Rectangular structural-tube scissor legs minimize deflection and allow safe handling of off-center loads.
- The lifts also feature safety chains at either end, a removable hand rail, and steel approach ramps and bridge plates.

VERSATILE DOCK  
LIFTS BRING  
FLEXIBILITY TO  
MATERIAL HANDLING

DOCK LIFTS CAN HELP  
MATERIAL HANDLING  
OPERATORS LOAD  
AND UNLOAD TRUCKS  
MORE EFFICIENTLY
