

Upenders

Upenders are the perfect tool for repositioning loads from a horizontal to a vertical position.

Presto ECOA Lifts offers 90° upenders in a variety of configurations, capacities and platform sizes. Upenders can be supplied with a solid platen or forks depending on the application and can be mounted on a scissor lift to create a Lift & Tilt.

Presto UT90 Series upenders are ideal for changing rolls or coils from "eye-to-the-sky" to "eye-to-horizon" quickly and easily without damage. They are equipped with 48" x 84" platens and can be equipped with platens up to 48" x 48".

The UT90 is available with 2000 or 4000 lbs. capacities.

Ecoa Hue series heavy-duty electrohydraulic tables offer capacities of 2,000 to 10,000 lbs., tilt angles to 90 degrees and a wide range of platform sizes. Feature a lowered height of 10-12". Includes a limit switch and mechanical stops in both directions.

We have the people and the tools to create custom products to meet your unique material handling needs.

In late 2016 ECOA became part of the Presto Lifts family. We are proud to continue the ECOA tradition of excellence that began in 1960.

ECOA's products have allowed Presto ECOA to expand the production of bigger footprint, heavier capacity and custom designed equipment.
