

Powder Coated

All our jib cranes are powder-coated in-house for long life protection. Powder-coated surfaces are more resistant to chipping, scratching, fading, and wearing compared to other finishes.

Ergonomic Operation

The jib arm design keeps the weight on the arm to a minimum, greatly reducing the effort required for operation.

Custom Solutions

We believe that providing the customer with all the required systems configured exactly to their needs is essential to ensure the installed project is 'fit for purpose.'

Workstation Jib Cranes

Met-Track® workstation jibs are a perfect handling solution for supporting tool balancers, air balancers, hoists, vacuum lifters and welding equipment used in a close work area. Each system is configured with the operator in mind and allows users maximum control with minimum effort.

- Loads up to 2000lbs
- Spans up to 20 feet
- Floor & wall mount options
- Floor-mounted rotation up to 360°
- Wall-mounted rotation up to 200°
- Low cost
- Power & air rotation options
- Simple to install
- Made in the USA
- In-track and tagline festoon options
