

Powder Coated

All our monorails are powder-coated in-house for long life protection. Powder-coated surfaces are more resistant to chipping, scratching, fading, and wearing compared to other finishes.

Ergonomic Operation

Our monorails are configured with the operator in mind reliably reduce fatigue, ensure accurate load positioning, and prioritize ease of movement.

Custom Solutions

We believe that providing the customer with all the required systems configured exactly to their needs is essential to ensure the installed project is 'fit for purpose.'

Workstation Overhead Monorails

Met-Track® workstation monorails enable you to achieve effortless and reliable area-serving overhead handling for a wide variety of applications. The steel track design combines high strength and low weight, with a running track profile and standoff reinforcement to considerably increase span distances.

- Loads up to 4000lbs
- Runway supports up to 40 feet
- Ceiling & floor mount options
- Modular design
- Simple to install and extend
- Low cost
- Motorized tractor units
- Track transfer units
